If $A$ is a context-free language, then there is a number $p$ (pumping length) where, if $s$ is any string in $A$ for $|s| \geq p$, then $s$ may be decomposed into 5 pieces $s = uvxyz$ satisfying

(a) for $i \geq 0$, $uv^ixyz^i \in A$

(b) $|vy| > 0$

(c) $|vxy| \leq p$
