Job Description
Software Engineer (ETL) - 1030535

Description
Joining Centene means you'll be surrounded by colleagues who are dedicated to meeting their own high standards, to inspiring their teammates and to making a positive impact on underinsured and uninsured individuals. We are fast, agile, customer-focused multi-taskers with a commitment to implementing the latest technologies. If these same things get you excited, we hope to hear from you.

Position Purpose:
- Design, build, test and maintain scalable and stable off the shelf application or custom built technology solutions to meet business needs
- Contribute to the entire implementation process for new applications and enhancements to existing applications
- Meet with business partners to understand business needs
- Contribute to overall solution design
- Responsible for build and test of applications
- Conduct root cause analysis and complex performance tuning

Qualifications

Education/Experience:
- Bachelor's degree in Computer Science, MIS, related field or equivalent experience.
- 2+ years of related experience.
- Healthcare Experience (preferred), SQL (required), Informatica or similar ETL tools (required), Teradata or other relational database systems (RDBMS) (preferred), Unix (preferred)

Centene is an equal opportunity employer that is committed to diversity, and values the ways in which we are different. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, national origin, disability, veteran status, or other characteristic protected by applicable law.
