Hacking - Woops

Long story short, I am missing a set of slides for hacking. Here’s the relevant data as a place holder:

• **Black Hat**: Black-hat hackers violate computer security for personal gain

• **White Hat**: “ethical hackers,” experts in compromising computer security systems who use their abilities for good, ethical, and legal purposes rather than bad, unethical, and criminal purposes.

• **Grey Hat**: doesn’t work for their own personal gain or to cause carnage, but they may technically commit crimes and do arguably unethical things.
Hacking - Woops

• **Hactivism**: act of hacking, or breaking into a computer system, for a politically or socially motivated purpose
  • Anonymous: example of hactivist group

• **Slacktivism**: actions performed via the Internet in support of a political or social cause but regarded as requiring little time or involvement
