Computer Science Internship in Bozeman, Montana

Required for Candidates (no exceptions):

- Attending Montana State University in Computer Science or closely related field
- Currently living in Bozeman, Montana or surrounding areas
- GPA of 3.8 or higher
- Junior, Senior, or Graduate status

Do you enjoy solving a diverse set of challenging technical problems? Are you looking for a dynamic, fast-paced environment where you can stand out and showcase your programming skills? We need intelligent and motivated people to help us deliver and improve upon our innovative, market-leading Cloud applications. Our focus is on an enterprise class, performant, scalable and reliable service backend that manages billions of transactions a month and terabytes of data. We offer a great opportunity to work on a successful and growing team where you will be likely to see and use the software you build in your daily life as you interact with brands around the world.

As a Software Developer on our Platform team, you will write clean, well-designed, readable, and elegant code. We are looking for creative problem solvers and innovative thinkers who can:

- Use industry standard development processes and testing practices to add new functionality to existing software
- Modify, test, debug and maintain existing code and the associated unit and acceptance tests
- Participate in design discussions and code reviews
- Collaborate with other team members
- Understand and improve underlying architecture
- Work closely with your Scrum team and actively participate in meetings

Preferred Knowledge, Skills, Abilities, and Background:

- Strong skills in several of the following: SQL/database skills, particularly with MySQL, SOAP, Linux, C, C++, Java
- Familiarity with Test Driven Development, Continuous integration, Scrum
- Familiarity with Microservices and Enterprise Messaging Services
- Passion for problem solving and troubleshooting code
- Self-motivated, organized, with strong interpersonal communication skills
- Ability to complete tasks to meet tight deadlines

The hours are flexible to work around your school schedule. Pay starts at $30/hr.

If this sounds like something that you would like to be a part of, then apply today.
