Testing Technician - Part-time Student Internship

Job Description:
Be part of the Software Development Team and will be Writing, Running, and Analyzing test script suites in various languages for continuous testing of complex software applications. You will be working with experienced Software and Electronics Engineers. It is expected that this Intern position will transition to a full time Software Engineer position at Neuralynx upon graduation.
Location is in the Bozeman office.
Hourly wage is based on experience.

Non-technical wants:
- Able to digest and understand large, complex software projects.
- Willing to be the voice of concern if something is not working or looking right.
- Wants the opportunity to be exposed to all aspects of software development
- Focused on making the software usable and consistent for the customers.
- Very organized and can prioritize and manage their workload
- Collaborate easily within a team

Must haves:
- Incredible eye for detail
- Willingness to dig deep into how things work
- Ability to identify problems and brainstorm solutions
- Desire to exceed expectations
- Self-starter and desire to explore new technologies
- Desire to learn about, create, and embrace best practices
- Excellent documentation skills
- Comfort working with the shell (PowerShell, bash, Pearl, etc)
- Experience with, or a willing to learn, Python

Bonus points:
- Experience in one or more compiled programming languages, especially C++
- Experience with MATLAB
