Alpine Metrics Internship Posting

February 22, 2017

Are you looking to gain experience in a real life software start up? Alpine Metrics, LLC is looking for a Computer Science student to work as an intern software engineer at our Bozeman, MT office.

You will be working with the latest technologies from Microsoft Windows Azure, Visual Studio, SQL Server and Salesforce. Our product is a cloud based predictive analytics application and you will be part of the development, maintenance and testing process.

What we want from you:

- Understanding of SQL and relational database systems.
- Strong critical thinking and problem solving skills.
- An interest in new technologies and tools.
- Strong communication skills - we want a team player!

Having these skills is a plus:

- Knowledge of Web Development languages such as jQuery, CSS3, HTML5.
- Knowledge of a commonly used programming language, such as Java, C#, Python, etc.
- Knowledge of Salesforce, Salesforce Admin.
- Experience with cloud based solutions.
- Knowledge of Agile Methodologies.

What’s in it for you:

- Being part of a strong small team and working closely with experienced developers.
- Watching a company grow from a small startup to a successful and well-known business.
- Competitive compensation.
- Flexible hours during school. 15-20 hours a week.
- Possibility of full time employment upon graduation.
- Learning A LOT.
