</table>
| Salary & Benefits: | $10 per hour  
• Work Study preferred  
• Excellent on the job training and career experience.  
• Opportunity to learn new skills and apply those learned in the classroom.  
• Close to campus. |
| Hours: | 10 to 20 hours per week, beginning as early as January 2017 |

## Job Description & Tasks:
The junior developer will be primarily responsible for assisting in the development of a proprietary business software platform using C# and JavaScript/jQuery. Additional responsibilities include managing Microsoft Azure services, developing apps for Android and iOS, assisting with R&D (language and transpiler development, data science and machine learning, etc.) and contributing to technical documentation.

## Required Qualifications:
- Computer science or comparable major
- Disciplined adherence to cyber security standards
- Proficiency with HTML5 and CSS3
- Proficiency in at least one common programming language
- Ability to work effectively as part of a team
- Interest in subject matter
- Willingness and aptitude to learn
- Good academic standing

## Preferred Qualifications:
- Work Study
- Proficiency with JavaScript, jQuery, C#, ASP.NET MVC, and/or SQL
- Proficiency or familiarity with MS Azure services, MS SQL Server, T-SQL, MS PowerShell, MS Excel, Xamarin, MS Windows 10, Linux (Raspbian), node.js, Java (for Android development), Swift, and/or Objective C plus
- Knowledge of NoSQL databases, non-OOP paradigms, machine learning, and data science may be applicable depending upon course of R&D

## About Us:
Started in 2014, Elumus LLC is a boutique business solutions consulting company with a focus on solving common business application problems. The key tool in our toolkit is our proprietary software, Kiosker, which resolves common—and seemingly intractable—problems afflicting the vast majority of business software currently on the market.

Though originally developed to address issues with accounting software, Kiosker has proved to be a versatile tool applicable to nearly any business scenario. Our first client is a global corporation with revenue in the billions, and our first deployment with them has been a success. As we expand our footprint both through their enterprise and across a growing client base, we are looking to bring in fresh perspectives and ideas as we further develop the software.
