Software Engineer – CS / EE

Wood’s Powr-Grip is looking for an addition to our electrical engineering and computer programming department. We develop software for our vacuum lifters, cell phones, PCs, ERP/database applications, test frameworks and the web using C/C++, Java, Swift, Visual Basic, SQL, JavaScript and Python. On the EE side of things, we draw schematics and design printed circuit boards with microcontrollers, LCD displays, Bluetooth radios and lots of I/O, then write software for them and create tests for the hardware and software. In the next few years, we plan to take on additional responsibilities in IT managing servers, virtual machines, networking, and disaster recovery. There is always something new to learn!

If being a part of a small team that is constantly taking on new challenges sounds like your kind of gig, fill out our online application and we’ll start a conversation about how you can be a part of it. Strong software development skills are required, but learning additional programming languages can be done on the job. EE and IT skills are a bonus.

WPG is located in Laurel, MT, an easy commute from Billings. We have a casual dress code, cooperative culture, comfortable work environment and excellent benefits. Come and join us! Find out more about us and apply at https://www.wpg.com/about-us/employment-opportunities/
