Alpine Metrics Job Posting

October 1, 2016

Are you looking to gain experience in a real life software start up? Alpine Metrics, LLC is looking for a Computer Science Undergraduate or equivalent professional experience to work as a software engineer at our Bozeman, MT office.

You will be working with the latest technologies from Microsoft Windows Azure, Visual Studio and SQL Server. Our product is a cloud based predictive analytics application and you will be part of the development, maintenance and testing process.

What we want from you:
● Knowledge of a commonly used programming language, such as Java, C#, Python, etc.
● Strong critical thinking and problem solving skills.
● An interest in new technologies and tools.
● Strong communication skills - we want a team player!

Having these skills is a plus:
● Knowledge of Web Development languages such as jQuery, CSS3, HTML5
● Understanding of SQL and relational database systems
● Experience with cloud based solutions
● Knowledge of Agile Methodologies

What’s in it for you:
● Being part of a strong small team and working closely with experienced developers
● Watching a company grow from a small startup to a successful and well-known business
● Competitive compensation.
● Learning A LOT.
● A Bozeman lifestyle!
